# What makes IAP different?

## *Fusion (fu-sion)*

For over 40 years IAP has supplied designers, hospitality owners, and landscape architects with quality in-stock and custom commercial contemporary indoor & outdoor planters, extra large fiberglass planters, trash and recycle containers. To keep up with the needs of modern interiors and landscape architecture, the building materials for commercial and modern fiberglass planters have become something of a science. The all weather IAP containers combine natural and synthetic materials to create lightweight, sculptural forms that can be used both indoors and out. Carefully made by hand, each piece is constructed from a fiberglass shell with a natural metal finish applied over the top. They are then hand polished (Fusion finishes only) to achieve a rich, dimensional surface that will either patina over time or take on a matte finish, depending on the salt content of the air.

# IAP Fusion finish PLANTERS

## what's the difference?

Our signature engineering process combines the careful hand-layered application of fiberglass with the permanency of steel reinforcements, resulting in a durable and lightweight planter for indoor and outdoor use.

IAP offers a wide selection of standard finishes of Fusion or LPU marine grade paints.

Our Fusion finish is created by fusing natural metal to the fiberglass shell. This finish is hand-polished to create a rich industrial surface which will gracefully patina over time.

For a uniform application, IAP's standard painted finishes are marine-grade. This LPU paint is a high-performance coating for UV deterrent, color retention and durability.

COMMERCIAL GRADE

LIGHTWEIGHT MATERIALS

HANDCRAFTED FINISHING

**042 • MONSOON • 72"L x 18"D x 36"H • I – Cast Iron**

[View price list for available sizes.](#)

The largest selection of commercial grade rectangular planters available, the Monsoon is constructed out of hand laid fiberglass and steel reinforced. Our containers have stood the test of time with over two decades in commercial applications, no other container on the market is built to the same standard. Select from marine grade paints or our line of signature Fusions, a process by which metal is fused to the fiberglass structure to withstand UV and scratch resistance. Casters and internal irrigation are optional, custom sizes available upon request.

Available finishes. See PAGE 64 for full list.

**053 • SIDEKICK • 36"SQ x 36"B x 34"H • R – Oxblood**

[View price list for available sizes.](#)

The recessed base of the Sidekick Planter polishes its profile giving it a floating quality that ingeniously lightens up the standard square planter. A seamless addition to contemporary indoor or outdoor designs, this modern beauty is resistant to UV rays and scratching. It is finished in your choice of marine grade paints or signature Fusions, a process by which metal is fused to the fiberglass structure.

Available finishes. See PAGE 64 for full list.

**035 • TIBURON • 18”D x 12.75”B x 32”H • SW Shiny White**

[View price list for available sizes.](#)

The Tiburon Planter displays starkly bold and potent style, whether it's being used for plants or as a trash container. Seriously durable, this lightweight fiberglass planter is suited for both indoor and outdoor designs. UV-resistant and scratch-resistant, each planter is hand finished in a choice of marine grade paints or one of our signature metal Fusions, which will develop a unique patina over time.

Available finishes. See PAGE 64 for full list.

The Orbit planter boasts a boldly angled profile that is suited for inside and outdoors. A lightweight yet durable fiberglass structure, this modern planter is finished in a choice of fade-resistant marine grade paints or one of our trademark metal Fusions, which develop a unique patina over time. Constructed by hand to exacting standards, each planter is resistant to UV rays and scratches.

Available finishes. See PAGE 64 for full list.

**032 • MAVERICK • 23”D x 15.25”B x 20”H • B – Bronze**

[View price list for available sizes.](#)

The dramatic lines of the Maverick Planter make for a strikingly modern take on the traditional container. A lightweight yet remarkably durable fiberglass structure, this contemporary planter is beautiful enough to keep inside and strong enough to go outside. UV-resistant and scratch resistant, the planter is finished in a choice of fade-resistant marine grade paints or one of our trademark Fusions, a natural metal finish that will age gracefully.

Available finishes. See PAGE 64 for full list.

Planting instructions from IAP

Indoor planting

- Determine desired finished plant height.
- Build an elevated base with waterproof material. We recommend green flower foam.
- Place a saucer and grow pot on top of the elevated waterproof material.

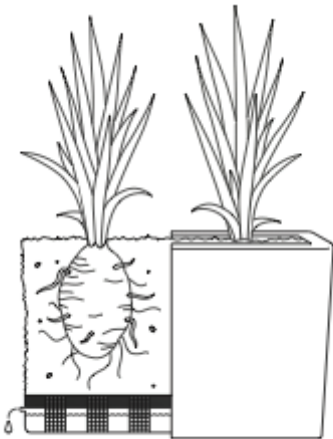

Outdoor planting

- Prepare the container for planting by drilling one or more small drainage holes in the bottom of the fiberglass pot. Make the diameter of the holes roughly 1/4-inch up to 1-inch depending upon the size of the container.
- Place screening material at the base of the container, and add 1 to 2 inches of base rock. This step is optional but will aid drainage and prevent blockage.
- Fill the fiberglass container roughly halfway up the sides with lightweight, bagged potting mix. Test for plant height as you want the plant to sit at the same level in the soil as it occupied in its previous location. You also want to maintain at least 1 inch of space from the soil surface to the top of the container to act as a watering catch.

Self-Watering Containers\*

- Determine what type and how many plants that you will need. Have the following ready: IAP container, casters (optional), sufficient quantity of growing media (lighter soil mixes with larger particles and more air space), water source, knife or scissors, and filter fabric.
- Add grating to the interior of the container, it may be necessary to tilt and angle in order to clear the top lip. The grate should be level and well supported all the way around the interior of the container.
- Size and cut your filter fabric to cover the grating. This will prevent the soil from entering the water reservoir. You will have to create openings in the filter fabric in order to install the fill tube and the wicks. Cut an "X" in the desired openings of the grate and insert the wicks and fill tube.
- Now you're ready to pack moist soil into the wicks, the wick will allow water to saturate the soil and provide a way for the moisture to move to the upper chamber. Do not skip this step, the unit will not work if soil is not moist.
- Before you add your soil mix be sure that all gaps around the grate are filled with filler material, if you're a little short cut small strips of the screening material and pack into the gaps. This will keep the soil in the upper chamber.
- Fill the container with soil and plants within several inches from the top of the container. For typical irrigation, water thoroughly from the top and ensure all of the soil has been moistened. Depending upon the environment and the season you will have to water at different frequencies. Keep an eye on the water level and make sure there is a little air between the top level of the water and the grate, if you overfill the water will come out of the overflow. In cold regions you will void warranty if standing water remains in the container. If allowed to freeze you can damage your containers. To determine how often you need to water stick your finger about 1" deep into the soil. If it is dry it is time to water.

\* The self watering system is designed to reduce the frequency of watering, not replace it. You will still need to monitor and check the moisture of the soil weekly. To insure your plants are getting sufficient water. Depending upon your climate you will need to water the soil as needed. IAP can not guarantee or be responsible for your plants. It is your responsibility to properly set-up and monitor the system. This is designed as an aid not a total solution.

## Tops + Liners

IAP designs modern and versatile trash, recycling and compost receptacles. Considerate of the growing requirements to sort refuse, IAP creates containers that can easily be modified to suit your specific needs.

The following pages display containers that can be used as planters or trash/recycling receptacles. IAP provides appropriate signage to identify the use of each multi-purpose container.

All pieces are available in our wide selection of standard Fusion or LPU marine-grade paint finishes. If you have a specific design need please contact us directly for a custom quote.

# Finishes

			
BONE - BN	BRASS - BR	* BRONZE - B	* CAST IRON - I
			
* COPPER - C	ESPRESSO - ES	LIMESTONE - LS	* MATTE BLACK - MB
			
MATTE WHITE - W	OXBLOOD - R	SHINY BLACK - SB	SHINY WHITE - SW
			
* STAINLESS STEEL - SS	STERLING - ST	MATTE GREY - SW	COFFEE - CF

\* Indicates a fusion of metal and fiberglass technology that will patina naturally over time.

## CUSTOM FINISHES

All custom orders require a 50% non-refundable deposit and are non-cancelable. There is a minimum quantity of 12 pieces per design, size and color. Delivery time is longer as new molds require an additional 8 weeks of manufacturing time, with an additional cost for custom colors. This is only a printed representation of the color and may not be 100% accurate.

# Terms + Conditions

### ORDERS

Minimum Orders: There is no minimum order on standard shapes and finishes. Custom shapes or finishes have a minimum of 12 pieces each.

Placement of Orders: When ordering it is essential to include all of the following: P.O. Number, billing and ship to address, resale number (CA only), item code number, quantity, size, description, price and side mark.

Acceptance of Orders: All orders and change of orders must be acknowledged in writing. IAP is not bound in any way by the conditions and terms of the customer's purchase order when it may vary from IAP's customer policies.

### SHIPPING

F.O.B. Oakland, CA. Most of the orders will ship via LTL common carriers. Additional charges may apply for inside delivery, residential delivery, call before delivery, lift gate or any other special instructions. Please note the drivers are not obligated to assist with unloading of the shipments. We have excellent discounted freight rates that we pass on to our clients unless you already have negotiated pricing with the designated carrier. IAP can also ship utilizing your logistics company or your preferred carrier. For export shipments FOB Shanghai IAP will ship to the nearest port or airport. Additional charges will apply.

### SHIPPING ESTIMATES

This is an estimate only and may change due to the varying rate of fuel cost. The delivery charges can vary at time of delivery. IAP cannot guarantee the rates estimated.

### TYPOGRAPHICAL ERRORS

IAP makes every effort to ensure that the information presented in this catalog is correct to the best of our ability. In the event that an error occurs, IAP assumes no liability for such error.

Legal action will be taken to protect IAP designs.

### MAINTENANCE & HANDLING

In many cases our containers are constructed with a two part lip. The lip or rim is reinforced, however, it can be damaged if used as a leverage point to move or drag a potted container. Moving a potted container in this manner will automatically void the warranty. To safely move a container, it is necessary to lift the container from the base.

Metal Finishes: The metal finishes are durable; however, most of them will take on a patina overtime when used outdoors. You can slow the natural aging process by either spraying the container with "303 Aerospace Protectant" or applying a clear

wax. Be sure to test wax in a hidden area first.

Painted Finishes: Please do not use harsh cleaning chemicals on painted items as they will dull the finish. To maintain them, use a clear automotive paste wax or spray.

Custom Designs & Finishes: Custom orders require a 50% non-refundable deposit and are non-cancelable. Delivery time is longer as new molds require an additional 6 weeks of manufacturing time, with an additional cost for custom colors. For custom designs, call IAP at 1-800-426-6471.

### WARRANTY

IAP warrants to the initial purchaser that their products are of good material and workmanship, free of manufacturing defects. They will function as described under normal use and service for one year. Freeze and thaw can damage fiberglass containers. It is essential that water is able to drain from the containers. Damage from freezing and thawing is not covered by the warranty. Rough handling of the containers will void the warranty, such as lifting from the lip of the container while planted. IAP at their discretion will either repair, exchange, or give credit for any item proving to be of defective materials or workmanship.

### RETURNS

Your complete satisfaction is important to IAP. We will accept returns up to 10 days from receipt of merchandise of unused products in the original cartons subject to the following terms and conditions.

- Written approval and instructions must be issued by IAP before any merchandise is returned.
- Merchandise must be packed in original cartons, utilizing shrink wrap, and poly strapped to a pallet to avoid damage.
- If the returned merchandise is received damaged, IAP will not issue a refund.
- Shipping charges are to be prepaid by sender. No collect shipments will be accepted.
- Returns will be issued a credit valid for 90 days. A 40% re-stocking fee will be charged for approved returned items.
- Custom orders are not eligible for returns unless there is a manufacturing defect and IAP has issued a written approval to accept the return.
- All items must be returned to IAP distribution center.

### INSPECTION OF SHIPMENTS

Carrier will provide a bill of lading for receiver to verify and sign. The receiver must use the bill of lading to verify that they have received the correct quantity and items in good condition. No claims can be made for missing merchandise after the documents are signed.

Important: IAP checks all merchandise for quality and damage before shipping and is not responsible for any damage during transportation. It is essential to inspect for damage prior to signing the bill of lading.
