## Description

The largest selection of commercial grade rectangular planters available, the Monsoon is constructed out of hand laid fiberglass and steel reinforced. Our containers have stood the test of time with over two decades in commercial applications, no other container on the market is built to the same standard. Select from marine grade paints or our line of signature Fusions, a process by which metal is fused to the fiberglass structure to withstand UV and scratch resistance. Casters and internal irrigation are optional, custom sizes available upon request.
