## Description

The Fusion container boasts a pointedly geometric profile that's equal parts curvy roundness and sharply squared. A durable, lightweight fiberglass container constructed to exacting standards, the Fusion offers a divided interior and can double duty as trash container or ash/trash. Custom finished in a choice of remarkably resilient marine grade paints or trademark metal Fusions, all of IAP's designs are suitable for indoor and outdoor use and are resistant to UV rays and scratching. Shown above in Matte Black split top ash/trash and also available as a trash only top.
