Description

A classic form combined with a modern texture makes the Neptune a great conversation piece. The Neptune is just the right scale for an entryway or niche and will add a high level of sophistication to any space. A durable, lightweight fiberglass container constructed to our exacting standards, all of IAP's designs are suitable for indoor and outdoor use and are resistant to UV rays and scratching. The Neptune Planter is finished in a choice of remarkably resilient marine grade paints or trademark metal Fusions.
