Description

The Lava Planter is a pert octagonal container gently overflowing out at the top to soften its faceted features. Constructed by hand to our exacting standards, this durable, lightweight fiberglass design is as strong as it is beautiful. Finished in a choice of fade-resistant marine grade paints or trademark metal Fusions, all of IAP's designs are suitable for indoor and outdoor use and resistant to UV rays and scratching. Shown here to the right in Matte Black and in Bronze below, the Lava Planter flows seamlessly with the Sultan Planter.
