Description

The dramatic lines of the Maverick Planter make for a strikingly modern take on the traditional container. A lightweight yet remarkably durable fiberglass structure, this contemporary planter is beautiful enough to keep inside and strong enough to go outside. UV-resistant and scratch resistant, the planter is finished in a choice of fade-resistant marine grade paints or one of our trademark Fusions, a natural metal finish that will age gracefully. Shown above in the first two images is our Bronze and the last image is our Matte Black Fusion.
